

83 INDUSTRIES LTD

Designed for Farmers, Engineered for Excellence

We specialize in crafting durable, high-quality solutions to meet the needs of hardworking individuals. As a small welding and fabrication shop, we take pride in offering custom creations that make everyday tasks simpler and more efficient. Whether it's innovative systems like the Tether remote tractor solution or general fabrication work, our commitment is to deliver reliable, practical tools for your unique challenges.

About 83 Industries Ltd

Founded in 2019 by a passionate duo, Lance and Mike, 83 Industries Ltd began with a simple mission: to provide robust repair and fabrication solutions tailored to the unique needs of the various industries. Our core services have evolved to include not only welding and fabrication but also specialized diesel technician services.

83 Industry Tether System

The Tether remote tractor system is made for farmers like you. This system saves you time by letting you handle tractor tasks quickly and efficiently, giving you more hours in the day for everything else. Plus, it's built to last a long time with minimal upkeep. You can focus on farming, not fixing.

User-Friendly Tool

The Tether remote tractor system is designed for farmers, offering ease of use and full functionality with a remote that puts complete control at your fingertips.

Cost Effective Solution

Starting at just \$3,800, the Tether system is an investment in efficiency and reliability, designed to save you time, reduce operational costs, and maximize productivity in your farming operations.

Equipment Longevity

Enhance equipment longevity with an automatic cooldown feature designed to protect the engine, extending its lifespan and reducing wear and tear.
