Custom Metal Fabrication Built For Durability

We specialize in custom metal fabrication, from laser welding and CNC machining to engineered parts and custom builds. Our equipment is built to stand up to daily use and harsh farm environments, trusted by producers across Canada, who rely on quality that lasts.

[Our Products](#)[About Grand Manufacturing](#)

Proudly Serving Farmers and Industry Across North America

We are a Canadian-based fabrication company delivering high-quality, custom-built equipment and stainless-steel hog feeders. Whether you're managing a small or large operation or need a reliable part built to spec, our goal is to make your job easier with durable, straightforward solutions you can trust.

- Equipment Built to Last Custom Solutions That Work
- Designed for Farmers Stainless Steel Quality
- Customer-oriented Locally Made in Canada

[Learn more](#)[Our Services](#)

Custom Fabrication Services for Agriculture, Manufacturing, and Industrial Applications

We provide high-quality metal fabrication services designed to meet the demands of hog producers and industrial clients. Whether you need custom parts or production-ready solutions, we deliver work you can count on.

[All Services](#)

Laser Cutting & Engraving

We use precision laser equipment to cut and mark metal parts with clean finishes and custom detailing.

CNC Machining

We offer precise cutting, shaping, and drilling of metal components to produce accurate, repeatable parts for custom builds and industrial use.

Press Brake Forming

We form and bend metal components to exact specifications using modern press brake technology.

MIG & Fiber Welding

We offer precise cutting, shaping, and drilling of metal components to produce accurate, repeatable parts for custom builds and industrial use.

Roll Forming

We shape long runs of metal into uniform profiles built for structural and functional use.

Saw Cutting

We cut raw material to size with speed and accuracy, ready for your next step in production.

Flat Parts Deburring

We clean and smooth-cut parts to remove sharp edges and create a finished, safe product.

3D Printing

We offer rapid prototyping and small-batch plastic part production using reliable 3D printing.

3D Reverse Engineering

We replicate physical parts digitally for redesign, repairs, or accurate re-manufacturing.

3D CAD Design

We bring your ideas to life through detailed CAD drawings ready for fabrication or prototyping.

Get in Touch

Whether you're looking for custom fabrication, hog feeders, or just have questions, reach out. We're here to help with any inquiry.

A Closer Look at What We Build

Every product we deliver is crafted with purpose, precision, and durability in mind. From custom hog equipment to advanced fabrication projects, explore a selection of solutions we've built for clients across agriculture and industry in Canada.

Weanling Nipple Drinker – RCD

Durable stainless steel nipple drinker designed for young pigs.

[Add to Quote](#)

Nipple Drinker – FW90SS

Strong stainless steel nipple drinker designed for consistent and efficient water supply.

[Add to Quote](#)

Feed Wetter – HCFW

Durable stainless steel feed wetter with hex body, designed for cup bowls.
